

UrineTime™ II 24 Hour Collection System

- **New Two Liter Bottles**
- **Keyed Bottles More Stable**
- **New Package Options**
- **Enables Faster Diagnosis**

UrineTime™ II from Labcon improves on an already great product. The new 2 liter keyed bottles are much more stable than earlier models and with their keyed sides they now stay firmly oriented and locked together.

UrineTime™ II Solves an Old Problem

A problem occurs when more than one assay is needed for a single 24 hour urine sample and the assays require different preparations or preservatives. Unlike the usual method of collecting samples over two days, the UrineTime™ II reduces the time it takes to collect samples and speeds the diagnosis and treatment process.

UrineTime™ II is Convenient

Understanding and using UrineTime™ II is convenient for patients. And since their treatment can begin a full day earlier better care is assured.

Cost

UrineTime™ II is provided with everything needed to collect two 24 hour samples. Staff time is reduced since labels, packaging and transport accessories are provided in a neat package. And UrineTime™ II is perfect for outpatient use so there is no need to ensure compliance through admission.

Available in a single use kit, 4 kits in a box, or economical ready to assemble bulk packaging.

Item	Description	Unit	Qty/Cs
4010-110-010	1 Assembled Unit	1	1
4010-420-010	4 Assembled Units	1	4
4010-920-010	5 Sets Ready to Assemble	1	5

UrineTime™ II kits come complete with everything you need to collect safely two separate samples over 24 hours.
